

MD MANNAN SARDER

Software Engineer | Full-Stack Developer | Android Developer

Dhaka, Bangladesh | +88 01580377122 | mannansarder00@gmail.com

[LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Summary

CSE graduate with a strong programming foundation, adept at rapidly mastering new technologies to solve complex, real-world problems. Focused on delivering high-quality, practical software solutions in dynamic IT environments.

Technical Skills

Languages: JavaScript, TypeScript, Java, PHP, SQL

Web: Next.js 15, React 19, Node.js, Tailwind CSS, Three.js, SSE, Leaflet

Database/Backend: PostgreSQL, MySQL, Prisma ORM, NextAuth, Zod

Mobile & AI: Android SDK, Room Database, MVVM, Google ML Kit, YOLOv8, Computer Vision

Projects

MediMind – Intelligent Medical Report Analyzer

[GitHub](#) | [APK](#)

- Built a fully offline Android app using on-device Google ML Kit OCR and a custom ~1,500-line regex parsing engine.
- Curated a bilingual (Bangla/English) knowledge base (80+ WHO/NIH tests) with age/gender-adjusted ranges, report comparison, and reboot-safe reminders.
- Tech:** Java, Android SDK, Google ML Kit, Room Database, MVVM, MPAndroidChart.

RetailSync Hub – Integrated Retail & E-commerce System

[GitHub](#) | [Live](#)

- Designed a 4-role platform with dual-session NextAuth, SSE-based rider tracking on Leaflet, and an in-store POS terminal.
- Migrated 29 tables from legacy MySQL to PostgreSQL, preserving relations and sequences; built a dynamic analytics dashboard with daily revenue charts.
- Tech:** Next.js 15, TypeScript, PostgreSQL, Prisma, NextAuth, SSE, Tailwind CSS.

Personal Portfolio Website

[GitHub](#) | [Live](#)

- Engineered custom physics-based particle and node animations from scratch using the raw Canvas API (no library).
- Integrated 3D visuals using Three.js with full SEO metadata and structured data implementation.
- Tech:** Next.js 15, TypeScript, Canvas API, Three.js, React Three Fiber, Framer Motion.

Experience

Industrial Trainee (AI & Computer Vision)

Feb 2026 – Apr 2026

Robo Tech Valley, Dhaka

- Developed a real-time fruit freshness detection system using YOLOv8 and Computer Vision (97%+ accuracy).
- Engineered a data pipeline for model training with real-time inference with object tracking via a Streamlit dashboard.

Education

B.Sc. in Computer Science & Engineering (CSE)

Graduation: 2026

Green University of Bangladesh

Higher Secondary Certificate (HSC)

2020

Narail Govt. Victoria College.

Training & Courses

Graphics & Web Design — NIYD | Graphics Design (SEIP) — Narail TTC | Computer Basics & ICT — DYD | Digital Marketing (SEO) — DYD

Languages

Bangla (Native), English (Fluent), Hindi (Basic)
